Germany
for FINNSA

Info

natural wood

Pails

require care

Always keep your pail moist and never leave it without water in the hot sauna, as cracks may form.

These cracks will usually close again once the pail is soaked in water.

However, a slight loss of water is generally possible. Wood is a natural material.

3

Sauna Pail
Sealed Larch

REGENKELLE® by SAUNAGUT®

The distinctive shower-head nozzle causes the infusion water to fall like rain onto the stones. This allows for a more even distribution and precise dosing of water over the stones.

You will need less fragrance and also protect your sauna heater, as better dosing ensures less water reaches the heating elements.

Nozzle made of laser-welded stainless steel, handle crafted from oiled hardwood.

REGENKELLE® JUMBO, handle oak

Sauna Ladles

for professionals &
sauna connoisseurs

3 W Ladle by SAUNAGUT®

The 3-way waterfall-like pour evenly and precisely distributes the water. This reduces the amount of water and fragrance needed.

Compared to a standard ladle, more steam is generated, making the infusion feel hotter for the guest.

The heating elements of the sauna stove are protected, as the risk of water reaching them is minimized through better evaporation.

The ladle head is made from laser-welded stainless steel, and the handle is made from oiled oak wood.

Dimensions approx.: total length 53 cm.

330 ml 1  NEW Item-No. 6755

Do not leave the 3-W Ladle in the sauna and store it in a dry place.
