Upon request, we can supply the entire EOS range

Sauna Heater Gracil Floor-Standing Model

Space-saving, sturdy, and modern, this heater is ideal for narrow cabins and installations in front of glass surfaces.

Featuring an integrated connection box, flat rear, and triple-shell design with an anthracite-coloured powder coating and brushed stainless steel top.

Sauna stones included,
Stone basket vol. approx. 20 kg
Connection: 400 V 3N ~ 50 Hz.

Technical Data Sheet:

Dimensions approx.: H x W x D: 76 x 50.5 x 25 cm

1 6 kW (4 x 1.5 kW) Item-No. 9308-1

2 7.5 kW (5 x 1.5 kW) Item-No. 9308-2

3 9 kW (6 x 1.5 kW) Item-No. 9308-3

Heating Coil for Sauna Heater Gracil

4 1.5 kW Item-No. 9308-99

Sauna Heater P 1+ Floor-Standing Model

This compact, durable sauna heater is designed for commercial use. It provides rapid heating times thanks to optimal air convection and features a robust stainless steel construction with an anthracite powder coating and adjustable feet.

It has dual-circuit wiring and a base with drip tray construction. LSG 10 required.

Sauna stones included,
Stone basket vol. approx. 40 kg
Connection: 400 V 3N ~ 50 Hz.

Technical Data Sheet:

Hazard

averted!

Sauna Heater Cover Protection System

According to DIN EN 60335, commercially used sauna heating devices must be equipped with safety cut-off switches. Enhance your EOS heater with this tested, standard-compliant safety solution.

Cut-Off Switch

The cover protection system consists of a stainless steel cut-off switch and a robust metal housing for the cut-off system designed for wall mounting directly above the sauna heater.

When the cover protection is pressed down, the heating process is interrupted. Once the object is removed, the operation resumes.

A mounting kit for free-standing heaters is available upon request.

Enjoy Your Heater for Years to Come...

To ensure the longest possible lifespan of your heater, please consider the following:

- Adequate air supply and exhaust in the sauna cabin are essential for proper air circulation
- Water should not come into contact with the heating coil
- For water hardness greater than 1, use descaled water for steam systems
- When operating with steam systems, the maximum permissible temperature must be in relation to a specific humidity level

In the table below, you will find the heating power required for your cabin size.

What to consider when using sauna stones...

- Clean with water before use and ensure they are well dried before use
- Do not pour water on cold stones; water can settle in cracks and cause the stone to burst when heated
- Carefully pour warm water over hot stones
- Avoid experimenting with alcohol or unsuitable liquids or solids to prevent residues
- Periodically reshuffle the stones, removing small stones and crumbs. Stack the stones in a way that allows for good air circulation

Stones are a natural product—splitting is possible due to extreme heating and cooling.

Many defects in ovens or heating coils are attributed to "unmaintained" sauna stones.

Old stones absorb odours and residues, altering the fragrance of your infusion.

Finnish Sauna with

Kerkes

Original Ceramic Sauna Stones "Kerkes"

The sauna stones are fired at approximately 1300 °C, making them extremely durable and ideal for sauna use. They retain heat exceptionally well.

For wood-fired heaters, the balls are particularly suitable, while the tetra stones are ideal for electric heaters. In the lower section, use the larger Kerkes stones, and on top, a layer of smaller ones.

Generally, they come in packages of 10 kg.

1 + Tetras, ø 60 mm, approx. 35 pcs. **Item-No. 1220**

2 + Tetras, ø 80 mm, approx. 20 pcs. **Item-No. 1221**

3 + Balls, ø 50 mm, approx. 60 pcs. **Item-No. 1225**

4 + Balls, ø 60 mm, approx. 35 pcs. **Item-No. 1226**

Info

Many Finnish saunas use Kerkes stones.

The perfect *Stone* for your infusion

Sauna stones not only create steam during the infusion, but they also help to balance temperature fluctuations in the sauna due to their heat-retaining properties.

To assist you in making a selection, we present our various types of stones below:

Basalt

The dark grey basalt is a type of volcanic rock and a favorite in saunas. It is an excellent heat retainer, providing even and long-lasting warmth.

Diabase

The "old" basalt, also known as diabase, has properties comparable to conventional basalt but originates from a deeper rock layer and is harder. As a volcanic rock, it is ideal for use in a hot sauna.

Porphyry

As a volcanic magma rock, porphyry is highly heat-resistant and, with its red hue, stands out among sauna stones. It also retains heat well, ensuring a pleasant sauna experience.

Soapstone

The light stone is an excellent heat storage medium, effectively balancing temperature fluctuations in the sauna. Soapstone primarily consists of talc and serves as an aesthetic highlight in any sauna.

Ceramic

Firing at extreme temperatures of around 1300 °C creates a durable material that ensures a lasting and relaxing sauna experience. Ceramic is resistant to thermal shock and is used in many Finnish saunas.

Evaporator Stone "Saunakko"

Place among the sauna stones in the hottest spot and fill with infusion water.

Enjoy your own little sauna geyser.

Dimensions approx.: 6 cm high.

Item-No. 0810

Steam Stones with Boreholes

Steam stones with four cavities for infusion water, providing pleasant and consistent humidity in the sauna.

Dimensions approx.: 6 cm high.

Total capacity of all boreholes approx. 150 ml.

2 stones

Item-No. 0820

Sauna Spirit "Löylyhenki"

Place the "Spirit" on your sauna heater and pour some water into its lap.

Dimensions approx.: ø 8.5 cm, 11 cm high

Item-No. 0825

Fountain "Saunatroikka"

Place the Saunatroikka on your sauna heater. Like a fountain, it creates three water columns that bubble up depending on the temperature of the stones.

Dimensions approx.: ø 8.5 cm, 9.5 cm high.

Item-No. 0840

Soapstone Candle Holder "Mystic"

Beautiful soapstone candle holder for tealights.

Dimensions approx.: 8 cm high.

Technical Data:
 Nominal Power Handling: 25 watts
 Music Power Handling: 50 watts
 Impedance: 8 Ω
 Frequency Response (-10 dB): 90-19000 Hz
 Avg. Sound Pressure Level: 90 dB (1 W/1 m)
 Net Weight: 360 g

Broadband Speaker FRS 10 WP for Sauna, 10 cm (4")

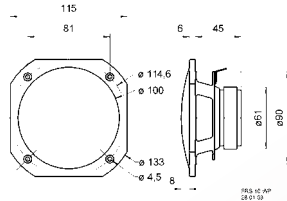

Features glass fiber membrane, plastic basket, and grille. With balanced frequency response and high efficiency with good mid and high tone reproduction

Permanent weather resistance makes it especially suitable for outdoor areas, swimming pools, saunas, and as built-in speakers for boats, ships, and open vehicles

- Functional at low temperatures
- Suitable for humid environments, seawater-resistant
- Temperature resistant up to 120 °C, material: PC (UL 94: V-0)

1 white Item-No. 5950-1

2 black Item-No. 5950-2

Technical Data:
 Nominal Power Handling: 40 watts
 Music Power Handling: 60 watts
 Impedance: 4 Ω
 Frequency Response (-10 dB): 70 - 16000 Hz
 Avg. Sound Pressure Level: 85 dB (1 W/1 m)
 Net Weight: 290 g

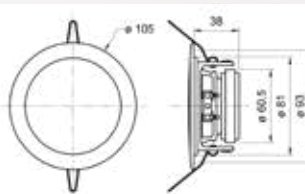

Broadband Speaker FR 13 WP Universal, 13 cm (5")

Featuring an injection-moulded plastic diaphragm, along with a plastic basket and grille. Completely corrosion and water-resistant due to the magnetic covering and silicone insulation of the connection lead. Clear high-frequency reproduction. Suitable for outdoor installations.

- Operational at low temperatures,
- suitable for damp environments, seawater resistant.
- Temperature resistant up to 80 °C, plastic: ASA (UL 94: HB)

3 white Item-No. 5952-1

4 black Item-No. 5952-2

Technical Data:
 Nominal Power Handling: 10 watts
 Music Power Handling: 30 watts
 Impedance: 8 Ω
 Frequency Response (-10 dB): 100-2000 Hz
 Avg. Sound Pressure Level: 84 dB (1 W/1 m)
 Net Weight: 330 g

Ceiling Speaker DL 8 ES Universal, 8 cm (3,3")

Ceiling speaker made of brushed stainless steel. Suitable for installation in suspended ceilings of all materials. Efficient installation in a circular cut-out with spring clips, electrical connection via push-fit terminal.

- Functional at low temperatures
- Suitable for outdoor use, UV-resistant
- Designed for installation in suspended ceilings in humid areas and heat cabins
